

GrandMaster[®] Suite

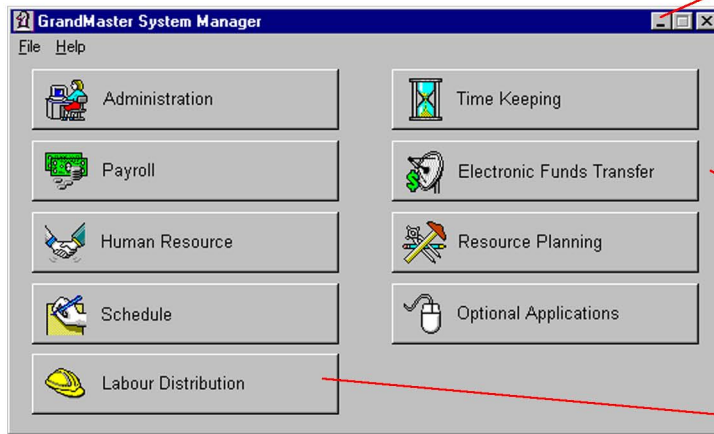

At last! You can achieve *comprehensive personnel resource management* by utilizing the power of the new and easy to use **GrandMaster Suite**! The Windows[™] based **GrandMaster Suite** adds a strategic dimension to helping you manage your personnel resources. **GrandMaster Suite** allows you to instantly receive the critical information you need in order to plan, monitor and control your personnel. Join the growing number of *CanPay* Payroll Partners that have switched to in-house payroll to save time, reduce costs and make informed management decisions while providing superior service to their employees.

We invite you to examine a simple but brilliant alternative to the hidden costs associated with outsourcing payroll. Transform your in-house payroll into a payday savings for your organization today. With **GrandMaster Suite**, you can integrate Payroll, Personnel Management, Employee Scheduling, Time-Keeping, Electronic Funds Transfer and Resource Planning modules into a powerful multi-user personal computer management tool that rivals larger main frame systems. Each user-friendly module shares a common database and has been designed to operate independently or as part of a fully integrated management system. Simply choose the modules you need to more effectively manage the personnel in your organization!

Power-Packed Features:

- Blue Ribbon Service
- Date Based
- Secure Multi-User System
- Windows Based
- Fully Integrated Database
- Modular
- The Canadian Payroll Expert
- Superior Development

Full Windows functionality makes learning intuitive and fast.

GrandMaster Suite's System Manager window launches you into each powerful module.

Use only the modules you require. Or choose them all for a complete personnel management system!

Blue Ribbon Service

As a customer driven organization founded in 1985, CanPay knows the importance of superior customer service. Our commitment to a *Blue Ribbon* level of service is reflected in our philosophy of continuous improvement in our products and rapid response to customer queries. The dedication of our team is characterized by our willingness to go the extra mile for our clients. We pride ourselves on exceeding our clients' expectations. This philosophy has resulted in a history of long-term relationships between *CanPay* and our existing client base.

Getting Started

GrandMaster Suite will operate on any PC running Windows 95/98, Windows NT, Windows ME or Windows 2000 (refer to the *System Requirements* on the reverse for further information). **GrandMaster Suite** is a multi-user system that will operate with any Net Bios compatible network operating system.

Date Based

GrandMaster Suite allows you to define transactions that will be processed on a future date even if the date does not coincide with the ending dates of a given pay period. Now that's flexibility!

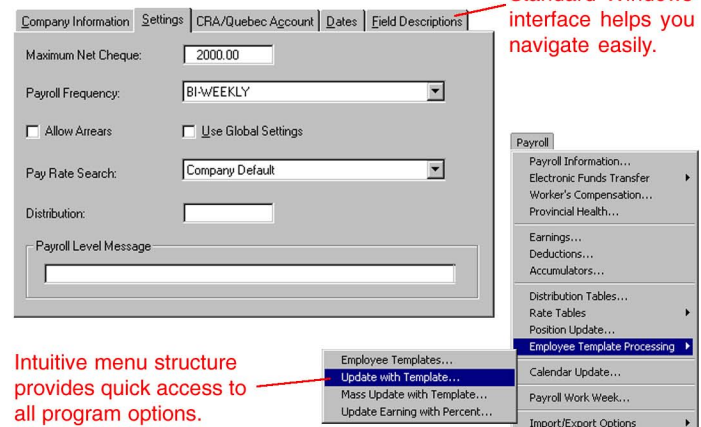

Secure Multi-User System

Your organization can have an unlimited number of users plus the ability to restrict access/functionality by user ID's.

Windows Based

Our popular Graphical User Interface (GUI) has been designed as a user-friendly, cost effective tool to minimize training time and boost productivity in your organization.

Standard Windows interface helps you navigate easily.

Intuitive menu structure provides quick access to all program options.

Fully Integrated Database

Updates to information from any module is available instantly to all other modules in the system. Decision-making requiring different information formats can be accommodated quickly and easily with just the click of a mouse.

Modular

Choose one powerful module or every module in the suite to address the specific requirements of your organization. As your needs change, you can always add modules later to expand your management system exactly the way you want it.

Power Packed Features

Each powerful module is feature loaded and can easily handle the most complex requirements. *GrandMaster Suite* is designed in such a way that it accommodates, not encumbers, even the most basic payroll. Use only what you need today knowing if you need more tomorrow it's already there.

CANPAY... The Canadian Payroll Expert

CanPay Software Inc. was established in 1985 to provide organizations with an effective in-house software tool that would mitigate the excessive costs associated with outsourcing payroll. Today the company is proud to assist many of Canada's most progressive and respected organizations coast-to-coast who are taking advantage of the savings of in-house payroll.

Superior Development

CanPay software is supported by a comprehensive research and development program which incorporates a philosophy of continuous improvement and value added features. That's why we provide software enhancements and current updates on a semi-annual basis. Software development based on extensive customer feedback is a hallmark of the *GrandMaster Suite* of products. Working hand in hand with hundreds of our Payroll Partners across Canada, *CanPay* has developed an enviable reputation for outstanding support, innovative products, sound technology development and long term, harmonious customer relationships.

CanPay is proud of the accolades and recommendations from prominent members of the personnel management and payroll software industries. We are even prouder of the significant contribution to the bottom line that our *GrandMaster Suite* is making to streamline the payroll and personnel activities in hundreds of successful organizations in Canada across a host of industries. Our ongoing

partnership with these leading organizations has driven the unique flexibility and the power of *GrandMaster Suite* enabling it to be fully customized to meet every payroll requirement. *GrandMaster Suite's* flexibility serves the basic needs of smaller organizations while accommodating the more complex and multi-dimensional requirements of large and mid-sized organizations.

CanPay's mission is to help Canadian organizations achieve greater control over key areas of their operations and realize the significant savings and efficiencies available through PC-based in-house payroll processing.
